1. CINI Cybersecurity National Lab

The CINI Cybersecurity National Laboratory is home to the research and academic component of the Italian cybersecurity ecosystem. The Lab works towards the creation of a cybersecurity technical workforce, the selection and training of cybersecurity talents, the consolidation of a multidisciplinary domestic cybersecurity community, and the enforcement of national and international cooperation for information sharing.

The Lab is co-founder of the “Italian Committee for Cybersecurity Research”, and it is actively involved in large research projects tackling different aspects of the cybersecurity domain.

The Cybersecurity National Lab is organized as a network of interconnected Nodes, located in 50+ major Italian Universities and research Institutions.

The Nodes include globally 560+ professors and researchers, and span the whole country.

2. Sponsorship Opportunity Portfolio

This document aims at outlining the Sponsorship Opportunities offered by the CINI Cybersecurity National Lab. In 2020, these will be mainly related to three Lab’s initiatives, namely:

- **ITASEC20**

  The *Italian Conference on Cyber Security* (ITASEC) is an annual event that will take place in Ancona, from February 4th to February 7th, 2020. It will gather Italian researchers and professionals working in the field of cybersecurity, from both private and public sectors, including academia, industries, research institutions, and government.

- **CyberChallenge.IT 2020**

  *CyberChallenge.IT* (CC.IT) is the fourth edition of a strategic project that aims at discovering and promoting 16-23-year-old cyber-talents living in Italy, redirecting part of the workforce towards themes of critical importance for the Country, and counteracting the worldwide shortage of cybersecurity skills. It will be held from December 2019 until July 2020 in 20+ university locations distributed across the whole Italian territory.

- **TeamItaly: the Italian CyberDefender National Team**

  *TeamItaly: the Italian CyberDefender National Team* was born thanks to the training experience of CyberChallenge.IT. The Cybernetic Security Unit (Nucleo per la Sicurezza Cibernetica - NSC) has entrusted CINI Cybersecurity National Laboratory with the task of organizing and managing the activities of the Team. It is aimed at participating in the most important international competitions in the sector, including the annual *European Cybersecurity Challenge* (ECSC).

In the attached documents, the above-mentioned events are presented, and the related sponsorship benefits are detailed.

The CINI Cybersecurity National Lab offers the opportunity for a 10% discount on the joint sponsorships of two of the initiatives, as summarized in the table below.
